Jenkins Place June 14 See Presidents Letter for More Information!

Let's Drive Cheaha

On Saturday, May 24, Bo Bogaty, Bill Corn, Eddie Bibb and I met at Buc-ees to begin our drive. The weather was threatening north of us, but we were left with very comfortable temps and off/on sunshine for the entire drive.

Our drive began by passing through downtown Leeds and traveling Old Hwy 78 to Pell City. Next we headed on a pleasant two lane across Lake Logan Martin on our way to the north side of Talladega. Finally we picked up a very winding and beautiful drive through the Talladega Forest

and up the mountain to the state park.

Our first stop was at the trail that headed out to Bald Rock Overlook. If you have never been there, it provides you with a beautiful view over the valley to the north. Next, we made our way to Bunker Tower, which is situated on the highest point in the state. Phyllis had packed for us a tasty picnic lunch of sandwiches, chicken salad, various chips, tea, and homemade brownies. Altogether a wonderful meal at a picnic table under the trees.

Continued on page 3

A Note From The **PRESIDENT**

The summer is just starting to roll and we have plans that, hopefully, everyone will enjoy participating in. We just finished a nice drive to Mt. Cheaha that is detailed in this newsletter.

Next, we are following up with the first of three visits to various member's homes to view their collections and have some fun. The first will be Garrett and Judy Jenkins, who have agreed to host June 14th. Plan to arrive anytime after 11 AM with lunch being served at Noon. Their address is:

12375 Wagon Wheel Trace
McCalla, AL 35111

We will not only get to enjoy seeing their cars, but they will also provide a hotdog lunch and homemade ice cream with all the fixings. Garrett plans to share GreatRace insights for those who are interested, which I know I am. This will include a chance behind the wheel of their rally car through their neighborhood on a mock rally course. Can't get much better on a summer day!

Please join us for this event. We certainly look forward to seeing everyone there.

Treasurer: Vicki Bolton
Secretary: Vicki Bolton
Editor/Webmaster: Charlotte Dahlenburg
Activities: Bill Gardner

Lunch was followed by a visit with the park historian at the CCC (Civilian Conservation Corps) building at the base of the tower for some history of the park. We also climbed the tower for a 360° view from the mountain top.

The return trip was also very pleasant, winding on country backroads through Talladega County, crossing the Logan Martin Dam, and on through Shelby County back to Leeds.

Our final stop was at the McClellan residence for some excellent desserts of homemade pecan pie and almond cherry dumpcake.

Hopefully, more can join in the fun for the next drive.

- Ken McClellan

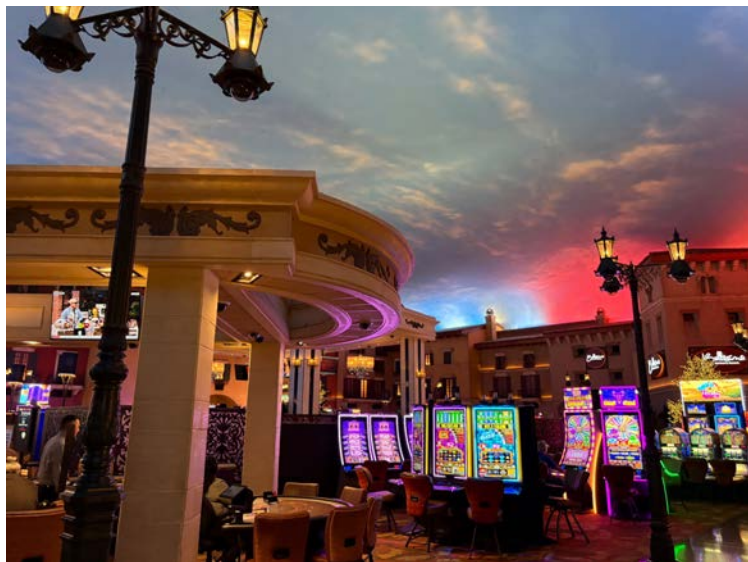

What Have You Been Up To?

Dual Meet in Tucson, AZ

Since there were no good airline connections from Birmingham to Tucson, we decided to drive the motor home to Tucson. And since we were going to drive, we decided to take a car to the Grand Nationals and Western Spring Nationals. The trip out was uneventful, and we took 2 and half days to drive out there. But one night after we stopped a storm came through and really rocked the coach. Other than not getting much sleep it was fine. The next day, as we continued westward, we encountered a small dust storm. It was small but powerful enough to almost blow us off the road. Fortunately, we did not encounter any more of

These two photos are from the inside of the casino. The ceiling is domed and painted so that when you first walk into the room you would swear you were outside.

This is one of the many eating areas in the complex.

those dust storms. We were able to stay at a very nice RV park right next to the hotel casino complex. Thursday night we went to the Rolling Through Time Auto Museum. What an amazing collection! On Friday, it was time for the Grand Nationals. The Crosley was being very temperamental and did not want to start. Finally, with some help, it cranked and we put it on the field. The little car won its first Grand Nationals so it will now go on to Dayton to try for a Senior. The day finished with a BBQ by the pool. The Nationals on Saturday brought out a few more cars so there was more to look at and enjoy. The day finished with a banquet inside the hotel. The hotel and casino was a beautiful venue and the cars were spectacular. We left very early Sunday morning to head home and be back Monday night. After two very long days and one fight with a construction barrel that we lost, we made it home. Thankfully, the barrel only took out one headlight. Now to get the car ready for Dayton!

May 2025

A Note From The EDITOR

It's that wonderful time of year again when the calendar is full and the toughest decision is choosing what to do next! The old car hobby is in full swing, with an abundance of events happening almost daily. Whether it's car shows, fundraisers, tours, or cruise-ins, there's something for everyone and every one of them is a great chance to share our enthusiasm for classic cars and promote the many benefits belonging to AACA and The Great Southern Region.

Our own club keeps the momentum going with at least one event every month. From "Let's Drive" tours to our monthly dinner meetings, there's no shortage of opportunities to connect, share stories, and enjoy the ride. Thanks to the hard work of our dedicated officers, we're in for some exciting events including some member car showcases.

We're proud of how far we've come in recent years. Our club has grown more active at both the local and national levels. Last fall, many of our members participated in the Nationals in Huntsville, a true highlight! And the "Let's Drive" tours continue to be a fantastic way to explore, engage, and enjoy our shared passion.

Have an idea for a new tour? Know a great dinner spot? Want to host an event at your own collection? We'd love to hear from you! Just reach out to Ken McClellan or Bill Gardner.

Here's to another season of great roads, great cars, and even better company!

April 3, 1885 – The internal combustion engine is patented

By Brian Corey
Reprinted with permission from Brian Corey

In the early 1880s, Gottlieb Daimler and Wilhelm Maybach started developing what would become known as the Grandfather clock engine, which Daimler received a patented for on this day in 1885. Their workshop? A garden shed behind Daimler's home in Cannstatt, Germany. What they came up with was an upright 0.5 hp engine, which featured

Right The 1885 Grandfather clock engine.
Photo by Morio – Own work, CC BY-SA 3.0

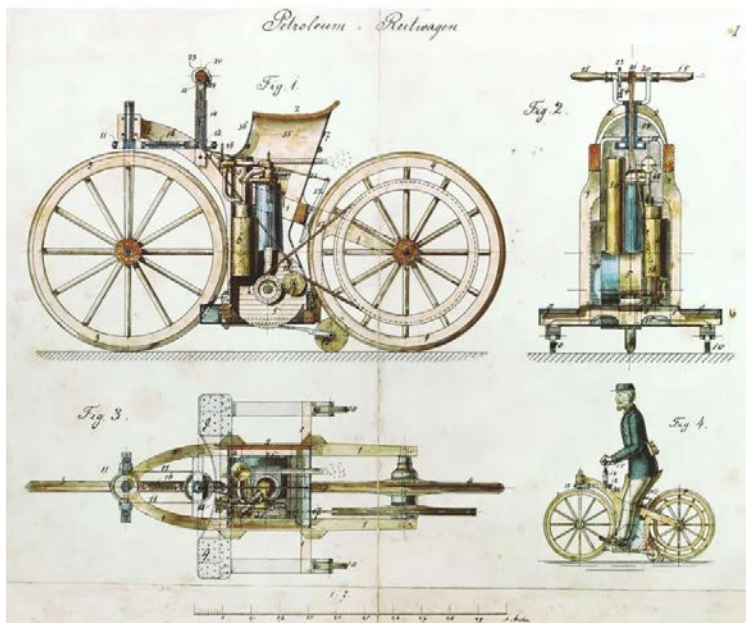

a single horizontal cylinder, air cooling, hot tube ignition and cam operated exhaust valves. It weighed in at approximately 50 kg (110 lb) and had a height of 76 cm (30 in). This was the first practical internal combustion engine.

They fit the engine to the pair's Reitwagen (translation: riding car) in November 1885, thus becoming the first full size vehicle powered by an internal combustion engine. Some also claim this as the first modern motorcycle, although it had stabilizers similar to a child's bike with training wheels. Gottlieb's son Paul, just 17 at the time, was the first to ride the contraption. He proved the viability of the motor with a test run of three kilometers (two miles) alongside the river Neckar, from Cannstatt to Untertürkheim, hitting a top speed of 12 kilometers per hour (7 mph). He did suffer a slight setback, after the seat caught fire due to the placement of the hot tube ignition.

Montrice Pia on the child's tricycle.

Early motorcycles

Other motorcycles came before, but all utilized steam power. This included the Perreaux and Roper, dating as early as 1867, and the 1884 Copeland. Additionally, Enrico Bernardi's 1882 one-cylinder petrol engine, which was fitted in 1884 to a children's tricycle. The Motrice Pia, as the vehicle was known, is often given credit for being the first internal combustion powered vehicle. However, the engine, which originally powered a sewing machine, wasn't fit to a full size vehicle until 1893.

Car Show Season is Right Around the Corner. Is YOUR Region/Chapter Prepared?

When your region or chapter holds a local car show, that is your best opportunity to recruit new members. The people attending your show are there because they already have an interest in antique cars. If your event is open to non-members, those who have registered and are showing their cars are already willing to participate. These are the folks you should be engaging about how much you enjoy being an AACAA member and that they should think about joining.

Now, don't be caught empty-handed at this point! Make sure your region/chapter has something to hand out to potential new members. When you are planning your event, be sure to reach out to National Headquarters to get a supply of materials to help you.

All of these items are available to you at no charge:

- AACAA National Membership Brochure
- AACAA National Membership Application
- Mustang Car Cutouts
- AACAA National Military Membership Application

To request a supply of these items, please email Karen (kwhite@aacaa.org) and include your region, address where you would like the items mailed to and the date of your event.

Now, go out there and get those new members!

JOIN THE FUN! AACAA MEMBERSHIP

Come for the Cars, Stay for the People.

- Celebrating vehicles 25 years and older
- AACAA is one of the largest and most inclusive car clubs in the world with more than 40,000 members

Cruising the Big Muddy in a \$15 Chevy

How three Minnesotans turned a tired 1939 Chevy into a river-powered raft and made history on the Mississippi

By Charlotte Dahlenburg

Source: Model Cars Magazine Forum; SASS Wire Forum; Hitoric Images Archive; Facebook Groups and Posts.

On June 21, 1955, three adventurous Minnesotans—Sam Gray, David Rutford, and Fred Hallberg—launched an unforgettable journey from the banks of Saint Paul, Minnesota. But this wasn't a typical road trip—it was a homemade raft cruise down the Mississippi River, powered by a beat-up 1939 Chevrolet they'd picked up for just \$15.

That old Chevy had seen better days. With 172,000 miles already under its belt, it had one more story to tell. The trio mounted the car to a raft constructed from

barrels and wooden planks. The rear wheels spun against a second set of wheels, which turned a propeller shaft. Ingeniously, they even linked the steering wheel to a rudder, making the raft steerable from the driver's seat.

"Fill it with oil—and check the gas!"

Their journey wasn't without its share of grease-stained drama. In St. Louis, Missouri, the engine's valves had to be ground. Outside Memphis, Tennessee, a propeller bearing burned out, but the crew managed to borrow tools from a friendly barge and fix it themselves—true backyard mechanics at work, even on the water.

As they drifted south, they ran into new trouble: a rat

stowaway that was quietly devouring their food. Despite their best efforts, they never caught a single fish, leaving them hungry and annoyed. Add in swarms of mosquitoes, river debris, and the pounding wakes of passing barges, and it's a wonder they didn't turn back.

But these were men raised on hard work, ingenuity, and a bit of stubborn grit. On July 25, 1955, more than a month after casting off, the crew finally arrived in New Orleans, hungry and weathered—but triumphant.

And then they did the unthinkable.

They decided to drive the same Chevy back to Minnesota.

Against all odds, the car made the trip. In just 49 hours, they rolled back into Saint Paul. The car consumed five gallons of oil on the journey north—hence the now-famous line delivered at a gas station:

“Fill it up with oil—and check the gas!”

Legacy of a River Roadster

Fred Hallberg, a devoted fan of Mark Twain, saw the trip as a personal tribute to American river life. Back in Minnesota, he and David Rutford had spent their youth restoring motorcycles in Fred's basement—repairs that later helped pay for college. David, a meticulous engineer, would go on to build water wells in remote villages across Africa and South America, always with a knack for solving real-world problems.

Fred chronicled their adventure in a series of travelogues for the University of Minnesota's Electricians' magazine. David gave presentations to Rotary and Kiwanis clubs, inspiring others with their tale of resourcefulness.

“In our family,” said a relative, “you kept records—even if no one believed the story.”

This wasn't just a river trip. It was a brilliant display of mechanical creativity, problem-solving, and the kind of determined optimism that defines the classic American car hobbyist. The Chevy might have been bought for \$15—but what it powered was a lifetime of stories.

YOUR CLUB NEEDS YOU!!

By Dave Anspach, 2025 AACA President

First of all, I want to say that it is an honor to serve as the 2025 President of our Club. It is an honor, however, that bears a great responsibility.

A responsibility that I take extremely seriously and I, in turn, am asking every one of you to share. To paraphrase John F Kennedy from his 1961 inaugural address "ask not what your club can do for you. Ask what you can do for your club". Now many of you will ask "what can I do". Lets talk about that.

Since we have been talking about membership for the past few years, lets deal with that first. Getting a new member is absolutely the easiest thing we all can do. We all have friends, neighbors, relatives and so on that are not presently members. With all the reduced rate and free memberships we offer, it really is as simple as ASKING someone to join. Who can say no to a gift?? With a smile and a little conversation on the fun you have, you will soon be signing up a new member.

You can't have fun if you don't participate, so get involved! If you aren't part of a region, join one!! If there isn't one close by.....start one. Regional meetings and activities with local friends are among the finest social events around. Some Regions do as many as 7 tours and a show locally every year. These busy folks are having a lot of fun.

Don't want to join a region...participate in National activities. What better way to get to visit areas all over the country and participate in a car activity than to do a National show or tour. From Maine to Florida, Carolina to California, and don't forget Puerto Rico, AACA events traverse the continent and more. No event near you?? Look for a few like minded people and set one up yourself!! Between Hershey headquarters and your directors and committees, there is plenty of help to get you going on

a successful event. And don't forget judging. Our judging program offers you the opportunity to get up close and personal to every kind of vehicle you can imagine from Abarth to Zagato. It is fun and easy to learn and packed full of opportunities to travel.

There are literally hundreds of opportunities to get involved on various committees and groups throughout your club. All you have to do is stand up and say "I can help". There is something for everyone, just let us know you are available, we'll find a place for you!!

So the bottom line is we have a fantastic club. What is missing is U!! Get new members, participate, have fun!!! I guarantee that you will peg the fun meter and have a great time!!
